MAY 1 1925

Mr. Frank L. Black.
Dearborn, Mich.

My dear friend:

Do not for a moment think I do not appreciate your interest in sending me the copies of the Independent that contain your articles on Books.

I have found them extremely interesting. The reason I have not acknowledged them before is because of some sick patients that occupied my entire attention. When we are anxious about some people we neglect

the conventionalities.

I want to thank you for your kindness and shall write you again on the completion of the series.

"Dick" Hicks - our Psi W friend and he is indeed a friend - I saw the other day and he said he intended also to write you.

Do you get anything from Wilson?

Some of his statements do not agree well with some of my own investigations. He seldom answers any of my letters altho I have sent him some things to run out that might put him right.

Mrs. Bates offered the cadaver to me for \$2000, but I don't want the thing, altho I would like to see it. I told Wilson to x-ray the legs but he never took much interest in a scientific effort to prove or disprove the claims of St. Helen.

Thanking you again,

Your sincere friend,

Amos T. Harrington
